

## AUTOMATIC DOORS

Swing, Double, revolving, telescopic, folding and Curved Automatic doors

## OVERVIEW

### DDA Solutions

Probably the greatest single benefit of automatic doors is the ability to offer easy access to anyone.

Many disabled people experience problems using traditional manual doors due to the physical effort required to open them. The situation is often made worse by poor door and access designs and the use of heavy door closers. For the 6.4 million disabled people in the United Kingdom, the increased use of automatic doors can only be seen as a good thing.

### ADSA Approved Installation

ACL Engineers are all trained to the rigorous standards set by the ADSA. The ADSA (*Auto Doors Suppliers Association*) exists to promote the highest standards in automatic doors and installation and to help specifiers and potential customers obtain the best solution to their needs.

We have experience of installations across a variety of commercial, public sector and domestic locations, including; Schools and Universities, Hospitals, Police Premises, Ministry of Defence.

## OPERATORS

### LOW ENERGY DOOR OPERATORS

Ideal for internal doors which are used infrequently, but still require automation. For example, a domestic disabled bathroom or bedroom. *Not suitable for high traffic areas.*

### SWING DOOR OPERATORS

Can be fitted to new or existing swing doors. Ideal solution for narrow openings with little or no room at the sides. Good directional traffic flow. Suitable for both internal and external doors. It's recommended that swing door operators are installed with safety sensors to fully comply with BS7036.

### SLIDING DOORS

Ideal where adequate opening width is available. Area of safety small and easy to protect. Excellent solution for very high traffic volumes. Aesthetically pleasing.

### FOLDING DOORS

Fast acting opening, good where opening space is limited.

*Our engineers are fully trained and have the relevant experience required to complete professional installations. Site surveys and specification service available.*
